

EASi Suite - Crop Management

“Rate is Agronomy... Quantity is Business...” We have created EASi Suite with this philosophy in mind. It is the first true crop recordkeeping software that recognizes the important distinction between agronomic information and business management. And most important, it helps you track both types of information without compromising either type.

The screenshot shows the EASi Suite application window. The title bar reads "EASi Suite -- D:\Projects\EASiSuite\Data\ES02Demo.mdb". The interface includes a menu bar (File, View, IntelliFetch, Help), a toolbar, and a sidebar with a tree view of the project structure. The main area displays a map of agricultural fields with labels such as "Bowers 7", "Bowers B40", "Bowers S40", "Cooper Farm", "Hoaglin Farm", "Hoaglin 1", "BoCom", and "Ingham". A scale bar at the bottom indicates ".00acres Scale: 45414".

The screenshot shows the "Pricing" tab in the software. It contains the following fields and values:

- Product ID: Pioneer 33Y0
- Name: Pioneer 33Y09
- Form: Count
- Purchase Unit: unit
- Default Rate: 30000.00 seed/acre
- Density: 80000.00 seed/unit
- Transfer Unit: Purchase Application
- Notation: (empty field)

The screenshot shows the "Ticket Manager" and "Allocations" tabs. The "Ticket Manager" tab displays a table of tickets:

Date	Ticket	Facility	Gross	Tar
9/16/2001	5773	48' Brock bin	85600.00	30850.0
9/18/2001	5774	48' Brock bin	81250.00	30850.0
9/18/2001	5775	48' Brock bin	79850.00	30850.0
9/18/2001	5776	48' Brock bin	80150.00	30850.0
9/18/2001	5777	48' Brock bin	79960.00	30740.0
9/18/2001	5778	48' Brock bin	79850.00	30740.0
9/18/2001	5779	48' Brock bin	81650.00	30740.0
9/18/2001	5780	48' Brock bin	78950.00	30740.0

The "GradeFactors" table shows:

Grade	Value
MC	18.6000
TW	56.0000
FM	0.0000
DM	0.0000
HD	0.0000
CB	0.0000
GR	0.0000
SP	0.0000
OD	0.0000

The "Allocations" tab displays a table of allocations:

	Date	Qty	Unit	Qty Open
Ted Macy	9/16/2001	27375.00	lb	0.00
Open Storage	9/16/2001	461.46	bu	461.46
Discounts		0.00		0.00
John Cooper	9/16/2001	27375.00	lb	0.00
Open Storage	9/16/2001	461.46	bu	461.46
Discounts		0.00		0.00

EASi Suite has full support for creating maps that are useful for conventional crop production practices without reducing its ability to deal with the latest in Precision Ag technology.

EASi Suite also has components for detailed tracking of non-spatial records such as scale tickets. In fact, EASi Suite has a built-in grain inventory management system that was built specifically to help you document the identity of your production and prove FSA yields.

EASi Suite Features Include:

- Strong support for the FODM standard. An open architecture framework for field operations that has been endorsed by John Deere and Pioneer Hi-Bred.
- Tracking all resources used in crop production: people, machinery, products, facilities.
- Support of the Common Land Unit concept implemented by FSA. Fields remain constant from year to year and are divided into crop zones within specific crop years.

- IntelliFetch™ data synchronization processes so that you can keep your database current with information from your service providers and other farming partners.

- A powerful set of GIS editors optimized for crop production tasks... field buffering, area measurement, etc.
- Optimized batch printing processes.
- Over 200 reports

Minimum Requirements: 1.5 GHz, 512 Mb RAM, 800 x 600 display, Windows 2000 or XP

Recommended: 2.5 Ghz, 1.0 Gb RAM, 1024 x 768 display, Win XP
